

Sheepcote Valley Grazing 2024

Over the last decade we have gradually re-introduced grazing to the valley, with the aim of restoring the flower-rich downland habitats found here, and maintaining an open landscape.

There are numerous alternative routes up, down and across the valley if you do not wish to walk amongst the sheep. Dogs are welcome in the paddocks but please keep them under close control.

The map and dates below show where the sheep will be through the season
Thank you for your cooperation and support.

**The Sheep will
return 15th May
and graze their way
down the valley
from section 4 to
section 1**

Exact dates will be posted as each compartment approaches it's time
